Summary

Since I was very young, I've had a great interest in software engineering and the transformative power of technology in our world. I hold a BSc in Informatics and Computing Engineering from FEUP and am currently pursuing an MSc in the same field, where I am further developing my skills and knowledge. I am particularly interested in backend systems, DevOps, cloud architecture, and networking, with a passion for building resilient and efficient systems that support modern applications.

Work Experience

Software Engineer Intern - Cloudflare July 2026 - September 2026

Member of the Cloudflare Radar team, contributing to the development of the Speedtest's Rust client and optimizing the performance of the Radar API. My work involved analyzing the existing codebase, identifying performance bottlenecks, and implementing improvements to enhance the overall efficiency of the system.

Research Fellow (Research Initiation Grant) - INESC TEC Oct 2025 - July 2026

For a Research Initiation Grant at INESC TEC, I worked on enhancing the security of DevOps environments, focusing on GitHub Actions. My work involved analyzing current pipeline security limitations, evaluating static analysis tools, and developed automated benchmark of said tools.

Software Engineer Intern - ARMIS Feb 2025 - Jul 2025

For my Capstone Project at FEUP, I interned at Armis, where I worked with Intelligent Electronic Devices (IEDs) and developed a simulation environment for them. My work focused on using Microsoft technologies and a microservices architecture to create a scalable testing framework.

Education

2025 - present	MSc in Informatics and Computer Engineering at FEUP	
2022 - 2025	BSc in Informatics and Computer Engineering at FEUP	(17/20)
2013 - 2019	Classical Piano at Aveiro Calouste Gulbenkian Music Conservatory	

Extracurricular Activities

Co-Head of Projects - NIFEUP Oct 2025 - July 2026

Helped coordinate and manage the projects at NIFEUP. I still remain as a member of the team, contributing to the development of new projects and initiatives.

President of the General Assembly - ACM FEUP Student Chapter Oct 2023 - July 2026

Responsible for overseeing the activities of the ACM FEUP Student Chapter, and I am still actively involved in the organization, contributing to the planning and execution of events and initiatives.

Skills

Programming Languages	C, C++, Python, Java, TypeScript, PHP, C#
Frameworks/Libraries	Flutter, React, Laravel, Next.js
Cloud/DevOps	DevOps, Kubernetes, Infrastructure as Code, Google Cloud, Docker
Concepts	Backend Systems, Microservices, Distributed Systems, System Design
